I AGENCY OVERVIEW

The Fargo-Moorhead Metropolitan Council of Governments (Metro COG) serves as the Council of Governments (COG) and Metropolitan Planning Organization (MPO) for the greater Fargo, North Dakota – Moorhead, Minnesota Metropolitan Area. As the designated MPO for the Fargo-Moorhead Metropolitan Area, Metro COG is responsible under federal law for maintaining a continuous, comprehensive, and coordinated transportation planning process.

Metro COG is responsible, in cooperation with the North Dakota and Minnesota Departments of Transportation (NDDOT and MnDOT, respectively) and our local planning partners, for carrying out the metropolitan transportation planning process and other planning needs of a regional nature. Metro COG represents eleven cities and two counties that comprise the Metro COG region in these efforts.

II PROJECT BACKGROUND AND OBJECTIVE

17th Street N is a major collector roadway located on the north side of Moorhead, MN. The corridor runs one mile from 1st Ave N to 15th Ave N where it is terminated by T intersections on both ends. Land uses along the corridor are primarily single family residences, with the southern three blocks comprised of commercial uses and a private school.

The roadway is a two lane road with parking on both sides. For the southern three blocks the roadway transitions to a three-lane section. The corridor is known for its excessive width with a curb-to-curb width of 60 feet and an estimated right-of-way of 140 feet.

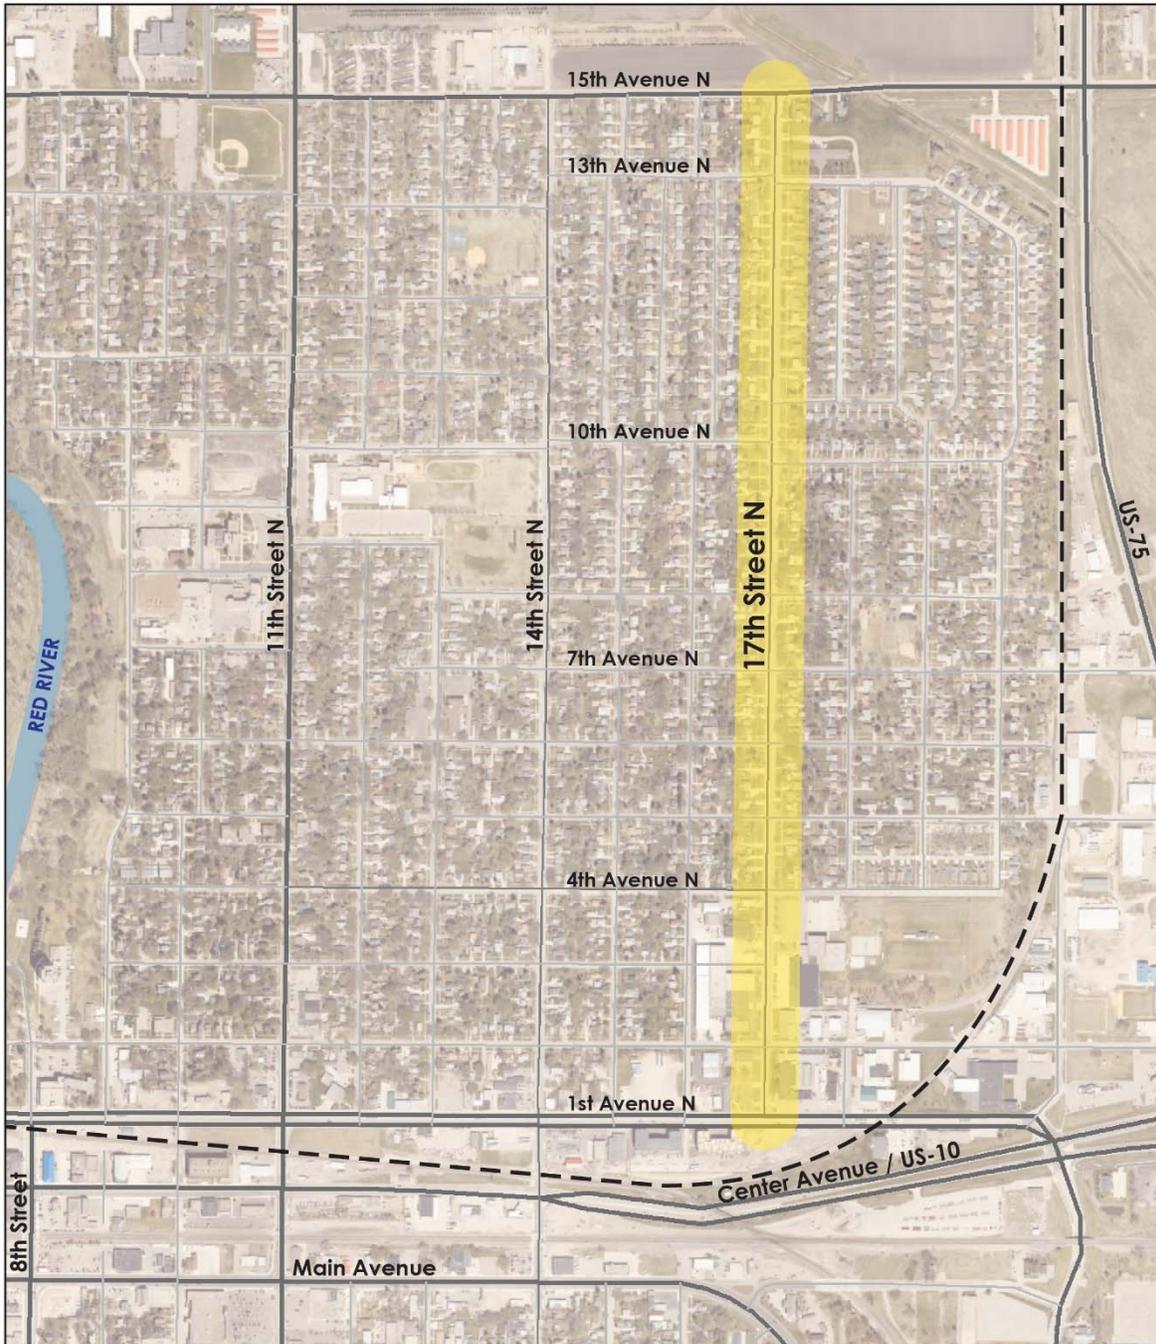

The City of Moorhead has discussed needed pavement improvements of this corridor, so reconfiguring of the roadway layout should be highly considered as part of the proposed roadwork. The current roadway and right-of-way widths present a great opportunity to improve the corridor's aesthetics, quality of life, multi-modal safety, provide traffic calming, provide bicycle facilities, and more. This corridor has the potential to be unique to the Fargo-Moorhead Area.

The objective of this study is to:

- Gather existing conditions and determine existing and future needs along the corridor.
- Provide planning-level corridor alternatives that would improve the corridor's aesthetics, multi-modal safety, provide traffic calming, provide bicycle facilities, and more. Alternatives should include graphics (sketches / renderings), comparison of alternatives, and planning-level cost estimates.
- Gather input from the public, stakeholders, and adjacent landowners to help guide feasible corridor alternatives.

Request for Proposals (RFP)
17th Street N Corridor Study

- Prepare a final report that will include but not be limited to: existing conditions, public involvement, graphics, corridor alternatives and costs, and recommendations.
- Provide options and alternatives to funding the corridor improvements

III SCOPE OF WORK AND PERFORMANCE TASKS

Outlined below is the scope of work that will guide development of the 17th Street N Corridor Study. Metro COG has included the following scope of work to provide interested Consultants insight into project intent, context, coordination, responsibilities, and other elements to help facilitate proposal development.

At minimum, the Consultant is expected to complete the following tasks as part of this project:

Task 1 – Project Management

This task involves activities required to manage the project including staff, equipment and documentation. It also includes the preparation of monthly progress reports, documenting travel and expense receipts, and preparing and submitting invoices. In addition, this task includes progress meetings with Metro COG. It should be assumed that progress meetings will occur monthly.

Task 2 – Existing Conditions

The Consultant shall gather existing condition information that will help inform the study, the public, and alternative development. This data should include but not be limited to:

- Vehicle speed data at a minimum of two locations along the corridor
- Vehicular traffic volumes (AADTs) at a minimum of three locations along the corridor
- Vehicle turning movement counts and signal warrant analysis at 1st Ave N and 15th Ave N
- Bicycle & Pedestrian counts at 1st Ave N, 8th Ave N, and 15th Ave N
- Crash data (last 5 years)
- Typical sections
- Pavement conditions
- Traffic control
- Bicycle & pedestrian accommodations
- Transit routes and transit stops
- Access locations
- Lighting
- Right-of-way

Task 3 – Purpose and Need; Planning

The Consultant shall work with the study review committee in developing a Purpose and Need Statement for inclusion within the study.

The Consultant shall consider current adopted plans, studies, and polices when developing this study. These plans can include but are not limited to: the City of Moorhead Comprehensive Plan, the FM Metro Transportation Plan, the FM Metro Bicycle

& Pedestrian Plan, the FM Metro Transit Development Plan, and the FM Metro Complete Streets Policy Statement.

Future conditions and needs along the corridor and surrounding area should also be considered with developing this study.

Task 4 - Public Participation

Public participation will be in accordance with Metro COG's Public Participation Plan and will involve the following:

1) Study Review Committee Meetings

Metro COG will work with the Consultant in arranging a study review committee (SRC) which will consist of applicable stakeholders. The Consultant will be responsible in providing a minimum of three (3) in-person SRC meetings throughout the course of the study. The Consultant will work in cooperation with Metro COG in scheduling the meetings. The Consultant will be responsible for developing materials necessary to conduct the SRC meetings and for developing meeting summaries (i.e. meeting minutes) for distribution and review by the SRC. These meeting summaries shall serve as documentation of the SRC's guidance and decisions.

2) Public Input

Public input will be held to obtain feedback on the public's desire for improvements on the 17th Street N corridor. At a minimum, public input shall include:

- a) Website, Social Media, and Online Survey – Metro COG will host a project website for this study. Metro COG will work with the Consultant in obtaining materials to display on the project website. In addition to the website, the Consultant should plan for coordination with Metro COG, the City of Moorhead, and any other applicable agencies/organizations in utilizing social media for public notification and public feedback.

As a way to increase public participation, the Consultant should plan to develop online surveys which can be hosted on Metro COG's project webpage and shared via the City of Moorhead, social media, etc. The Consultant should plan for two (2) separate online surveys. The surveys will likely coincide with the public input meetings.

- b) Public Input Meetings – Two (2) public input meetings shall be held throughout the planning process. The first meeting should be held to introduce the project to the public, review existing corridor conditions, and obtain the public's ideas, desires, and vision for the corridor. The

second public meeting should be held after the study alternatives have been developed and evaluated by the SRC to collect public input on the proposed corridor alternatives.

The Consultant will be responsible for providing advertising materials including flyers, media release write-up, and an advertisement for the public notice to be published in the newspaper. The Consultant will also be responsible for mailing public meeting notices to all property owners adjacent to the corridor. All public notice costs, including mail costs, will be the responsibility of the Consultant and should be accounted for as part of the project budget. A postcard-size mailing may be used to reduce postage costs.

The Consultant will provide a summary of all public input meetings and is responsible for providing materials at the meetings, including but not limited to, sign-in sheets, comment forms, handouts, roll drawings, meeting display boards, and meeting presentations. All public comments received shall be recorded and included in the final report or an appropriate report appendix. The Consultant will provide a contact person for which the public to provide input. The contact person shall be made available by phone, mail and e-mail.

Task 5 – Development of Alternatives

Alternative corridor layouts shall be developed by the Consultant. A minimum of three corridor alternatives shall be developed – one no-build alternative and at least two build alternatives. Since the southern three blocks of the corridor differs from the rest of the corridor, a different set of alternatives may be necessary for this section. Alternatives should include both plan views and typical section views of the corridor. The alternatives shall be based on public input, guidance but the SRC, and local goals and objectives. Planning-level cost estimates shall accompany the alternatives.

Funding alternatives will be identified. The consultant will be expected to work with the City of Moorhead and Metro COG to identify and provide a description of project funding alternatives.

Task 6 - Draft Report

Upon completion of the previous tasks, the Consultant shall provide a draft report for review by the SRC and the public. The report shall include but not be limited to: existing conditions information, the study's purpose and need, public involvement information and results, corridor alternatives and costs, and graphics.

The report shall include an executive summary summarizing the key contents in the report. Also, the report shall include an appendix. All meeting summaries and technical analysis shall be included in the appendix of the report.

Task 7 - Final Report

Once comments on the draft report have been received and addressed, the Consultant shall assemble the final report. The final report shall be in PDF format.

Task 8 - Presentations

The Consultant should budget for up to three presentations of the final study to local boards and committees. These boards and committees may include the following: Moorhead Planning Commission, Moorhead City Council, Metro COG Transportation Technical Committee, and Metro COG Policy Board.

When a portion of the work under the Agreement is sublet, the Consultant shall obtain insurance protection (as outlined above) to provide liability coverage to protect the Consultant, the Client and the State as a result of work undertaken by the Subconsultant. In addition, the Consultant shall ensure that any and all parties performing work under the Agreement are covered by public liability insurance as outlined above. All Subconsultants performing work under the Agreement are required to maintain the same scope of insurance required of the Consultant. The Consultant shall be held responsible for ensuring compliance with those requirements by all Subconsultants.

Consultant's insurance coverage shall be primary (i.e., pay first) as respects any insurance, self-insurance or self-retention maintained by the Client or State. Any insurance, self-insurance or self-retention maintained by the Client or the State shall be excess of the Consultant's insurance and shall not contribute with it. The insolvency or bankruptcy of the insured Consultant shall not release the insurer from payment under the policy, even when such insolvency or bankruptcy prevents the insured Consultant from meeting the retention limit under the policy. Any deductible amount or other obligations under the policy(ies) shall be the sole responsibility of the Consultant. This insurance may be in a policy or policies of insurance, primary and excess, including the so-called umbrella or catastrophe form and be placed with insurers rated "A-" or better by A.M. Best Company, Inc. The Client and the State will be indemnified, saved, and held harmless to the full extent of any coverage actually secured by the Consultant in excess of the minimum requirements set forth above.

Exhibit B - Debarment of Suspension Certification

Background and Applicability

In conjunction with the Office of Management and Budget and other affected Federal agencies, DOT published an update to 49 CFR Part 29 on November 26, 2003. This government-wide regulation implements Executive Order 12549, Debarment and Suspension, Executive Order 12689, Debarment and Suspension, and 31 U.S.C. 6101 note (Section 2455, Public Law 103-255, 108 Stat. 3327).

The provisions of Part 29 apply to all grantee contracts and subcontracts at any level expected to equal or exceed \$25,000 as well as any contract or subcontract (at any level) for federally-required auditing services (49 CFR 29.220(b)). This represents a change from prior practice in that the dollar threshold for application of these rules has been lowered from \$100,000 to \$25,000. These are contracts and subcontracts referred to in the regulation as "covered transactions."

Grantees, contractors, and subcontractors (at any level) that enter into covered transactions are required to verify that the entity (as well as its principals and affiliates) they propose to contract or subcontract with is not excluded or disqualified. They do this by (a) Checking the Excluded Parties List System, (b) Collecting a certification from that person, or (c) Adding a clause or condition to the contract or subcontract. This represents a change from prior practice in that certification is still acceptable but is no longer required (49 CFR 29.300).

Grantees, contractors, and subcontractors who enter into covered transactions also must require the entities they contract with to comply with 49 CFR 29, subpart C and include this requirement in their own subsequent covered transactions (i.e., the requirement flows down to subcontracts at all levels).

Instructions for Certification: By signing and submitting this bid or proposal, the prospective lower tier participant is providing the signed certification set out below.

Suspension and Debarment

This contract is a covered transaction for purposes of 49 CFR Part 29. As such, the contractor is required to verify that none of the contractor, its principals, as defined in 49 CFR 29.995, or affiliates, as defined at 49 CFR 29.905, are excluded or disqualified as defined at 49 CFR 29.940 and 29.945.

The contractor is required to comply with 49 CFR 29, Subpart C and must include the requirement to comply with 49 CFR 29, Subpart C in any lower tier covered transaction it enters into.

By signing and submitting its bid or proposal, the bidder or proposer certifies as follows:

The certification in this clause is a material representation of fact relied upon by the recipient. If it is later determined that the bidder or proposer knowingly rendered an erroneous certification, in addition to remedies available to the recipient, the Federal Government may pursue available remedies, including but not limited to suspension and/or debarment. The bidder or proposer agrees to comply with the requirements of 49 CFR 29, Subpart C while this offer is valid and throughout the period of any contract that may arise from this order. The bidder or proposer further agrees to include a provision requiring such compliance in its lower tier covered transactions.

PURPOSE

Federal agencies use this form to obtain information from architect-engineer (A-E) firms about their professional qualifications. Federal agencies select firms for A-E contracts on the basis of professional qualifications as required by 40 U.S.C. chapter 11, Selection of Architects Engineers, and Part 36 of the Federal Acquisition Regulation (FAR).

The Selection of Architects and Engineers statute requires the public announcement of requirements for A-E services (with some exceptions provided by other statutes), and the selection of at least three of the most highly qualified firms based on demonstrated competence and professional qualifications according to specific criteria published in the announcement. The Act then requires the negotiation of a contract at a fair and reasonable price starting first with the most highly qualified firm.

The information used to evaluate firms is from this form and other sources, including performance evaluations, any additional data requested by the agency, and interviews with the most highly qualified firms and their references.

GENERAL INSTRUCTIONS

Part I presents the qualifications for a specific contract.

Part II presents the general qualifications of a firm or a specific branch office of a firm. Part II has two uses:

1. An A-E firm may submit Part II to the appropriate central, regional or local office of each Federal agency to be kept on file. A public announcement is not required for certain contracts, and agencies may use Part II as a basis for selecting at least three of the most highly qualified firms for discussions prior to requesting submission of Part I. Firms are encouraged to update Part II on file with agency offices, as appropriate, according to FAR Part 36. If a firm has branch offices, submit a separate Part II for each branch office seeking work.

2. Prepare a separate Part II for each firm that will be part of the team proposed for a specific contract and submitted with Part I. If a firm has branch offices, submit a separate Part II for each branch office that has a key role on the team.

INDIVIDUAL AGENCY INSTRUCTIONS

Individual agencies may supplement these instructions. For example, they may limit the number of projects or number of pages submitted in Part I in response to a public announcement for a particular project. Carefully comply with any agency instructions when preparing and submitting this form. Be as concise as possible and provide only the information requested by the agency.
