

15th Ave N Corridor Study

Project Overview

Fargo Moorhead Metropolitan Council of Governments (MetroCOG) is studying 15th Ave N, north of Dilworth, from Clay County Highway 9 (40th Street N) to Clay County Highway 11 (70th Street N). The corridor serves as a continuous east/west route across Dilworth and Moorhead and crosses the Red River into Fargo, ND. The corridor is currently a gravel surface. The study aims to develop future roadway alternatives and consider jurisdictional ownership for the maintenance of the roadway.

There are no imminent plans for improvements within the study area. This corridor study is the first step to identify what actions should be taken in the future.

Project Goals

- Identify known roadway and transportation issues and deficiencies within the study area.
- Develop future improvement alternatives based on needs of the public and traffic analysis.
- Outline future ownership and maintenance responsibilities of the corridor.
